

Same card for everyone. Your numbers, Edges, and weapons stay on the character sheet. The GM has the book.

You are a Wild Card. Roll your Trait die and a Wild Die (d6); keep the higher. You can take three Wounds. You start with 3 Bennies.

HOW TO ROLL

Keep the higher of Trait die and Wild Die. Both can **Ace** (max on the die → roll again and add).

- **Success:** 4+ after modifiers (TN 4 unless told otherwise).
- **Raise:** every 4 over the TN. One raise is the extra effect (better detail, +1d6 damage on an attack).
- **Opposed:** you still need a 4. They must match or beat you. Raises count from *their* total.
- **Unskilled:** no skill → **d4-2** (+ Wild Die).
- **Critical Failure:** 1 on *both* dice. Fails badly. You cannot Benny it.

Easy **+2**, hard **-2**, very hard **-4**. Wounds and Fatigue also subtract.

BENNIES (3)

Spend them. Unused tokens vanish at the end of the night.

- **Reroll a Trait** — keep the best total (not a Critical Failure).
- **Un-Shake instantly** — even off-turn.
- **Soak** — after damage, before Wounds. Vigor; each success and raise soaks **one Wound** from that hit. Soak them all and you are not Shaken. Once per attack; you may Benny the Vigor roll.
- **New Action Card** in a fight (after the deal).
- **Reroll damage.**
- **Nudge the story** — only if the GM allows (a small item, a bit more talk).

Joker on your card: act whenever you want this round, **+2** Trait and damage, and **every player** gets a Benny.

YOUR TURN (~6 SECONDS)

Cards: Ace down to 2. Ties: Spades, Hearts, Diamonds, Clubs.

Move **Pace 6" (12 yards)** and take **one action**. Movement is not an action. Climb, crawl, swim, or rough ground: 1" costs **2"**.

- **Run:** +d6 Pace (does not Ace), **-2** to all actions.
- **Multi-action:** up to three. Two = **-2** to both. Three = **-4** to all. Declare before you roll.
- **Free:** a short sentence, drop an item, prone, stand (**-2"** Pace), recover Shaken/Stunned once at the start of your turn, ready two familiar items.
- **Hold:** wait. Interrupt with opposed **Athletics**. Shaken or Stunned on Hold loses it.

HITTING AND HURTING

TRY	ROLL	BEAT
Knife / fists / grab	Fighting	their Parry
Gun	Shooting	4 + range
Grenade / thrown charge	Athletics	4 + range

Range: Short —, Medium **-2**, Long **-4**. 1" = 2 yards.

Raise on the attack: +1d6 damage (once). Damage dice Ace. Melee is Strength + weapon — **no Wild Die**.

Damage vs **Toughness**:

- Below Toughness → no effect that counts.
- Equal or higher → **Shaken**.
- Each raise on damage → a **Wound** (and Shaken).
- Already Shaken + another Shaken from *physical* damage → a Wound, still Shaken.

You: three Wounds, then Incapacitated. Each Wound: **-1** Pace (min 1") and **-1** Trait (max **-3**).

Extras (most watch, clerks, soldiers): **one Wound** and they are out.

Shaken: only move and free actions (you may still Run). Start of turn: **Spirit** as a free action — success and you act. Or spend a Benny anytime.

WHAT YOU CAN TRY

Say what you do. The GM names the Trait if it is not obvious.	
DO	TRAIT
See, hear, catch a lie, find a clue	Notice
Sneak or hide	Stealth (vs Notice if they are looking). Sneak-up success: Vulnerable; raise: The Drop. In a fight, roll at the end of your move (free)
Climb, jump, swim, throw	Athletics
Talk someone round	Persuasion (vs Spirit if they resist)
Scare / bark	Intimidation
Insult / rattle	Taunt (usually a Test vs Smarts)
Shoot / fight	Shooting / Fighting
Fix, cut, or set a charge	Repair (electronics Limited by Electronics)
Patch a Wound	Healing — 10 min per Wound level; success heals 1, raise 2; once per healer in the first hour
Help an ally	Support — any fitting skill; success +1, raise +2 (max +4)
Unbalance a foe	Test — opposed by the skill's linked attribute. Win: Distracted or Vulnerable. Raise: also Shaken

Language: talking skills use the *lower* of that skill and the language. Native tongue is never limited.

COMBAT TRICKS

- **Aim** (whole turn, stay put): next first shot ignores 4 points of range/cover/called shot — *or* +2 to hit.
 - **Defend** (whole turn, no extra actions, no Run): +4 Parry until your next turn.
 - **Wild Attack** (melee): +2 Fighting and damage; you are Vulnerable until the end of your *next* turn.
 - **Called Shot:** limb -2; head/vitals -4 and +4 damage. Face of an open helmet: -5, helmet does not count.
 - **Cover:** -2 / -4 / -6 / -8. Prone vs ranged at 3"+ is -4 (does not stack with cover).
 - **The Drop** (bound or truly unaware): +4 attack and damage, one action.
 - **Auto (RoF 3):** more than one shot in one action → Recoil -2. You may fire fewer. Reload a magazine = an action.
 - **Withdraw:** adjacent foes get a free attack. Extraction (if on your sheet) skips one.
 - **Gang up:** +1 Fighting per extra adjacent attacker (max +4).
- Distracted:** -2 Trait until the end of your next turn. **Vulnerable:** others +2 against you until then.

THIS NIGHT

- Default light is **Dark (-4)** on attacks, Notice, and similar. No target visible past **10" (20 yards)** without a lamp or a break in the dark.
- **Helmet** does not raise Toughness. Armor +2 only vs Called Shots to the **head**.
- Rank titles are speech — no extra Bennies.
- Team satchels, TNT, cutters, civilian coats: anyone may use them. Repair is demolitions.
- Edges live on your sheet. If one would change a roll, say so before the dice.

Stuck? Say what your soldier does. Rolling comes after. · Short paraphrase for the table; the book remains the rules.
