

TIE ORDER ♠ ♥ ♦ ♣ Countdown Ace → Deuce · reshuffle after any Joker · 1" = 2 YARDS · tonight's light, opposition, and house rules live on RUN.MD, not here

WILD CARDS — PCS & NAMED FOES Wild Die d6 with every Trait; keep the higher. Three Wounds, then Incapacitated.

EXTRAS — EVERYONE ELSE One Trait die. One Wound and they are out. Like Extras roll once as a group (Trait die + a Wild Die).

TRAIT ROLLS

TN 4 unless opposed or a listed TN (Parry). Easy +2, hard -2, very hard -4. Wounds and Fatigue also subtract.

- **Ace:** max on a die → roll again and add. Trait and damage Ace. The Running die does not.
- **Raise:** every 4 over the TN, after modifiers. One raise is the extra effect.
- **Wild Die:** one per action. With RoF or Frenzy it replaces a die – it never adds a hit.
- **Unskilled:** d4-2 (plus the Wild Die if a Wild Card).
- **Opposed:** actor rolls first, Bennies and all. Still needs a 4. Defender must meet or beat. Raises count from *their* total.
- **Critical Failure:** Wild Card rolls 1 on Trait and Wild Die. Fails badly, no Benny. Extra: a 1, then a d6 – another 1 confirms. Multiple dice: over half show 1, Wild Die included.

BENNIES

Players start with 3. Leftovers vanish at end of session. Award for Hindrances played, clever moves, a line that lands. Be generous early; scarcity makes them hoard.

Spend (own character only): reroll a Trait, keeping the best – a CF still stands · un-Shake instantly, even off-turn · Soak · draw a new Action Card after the deal · reroll damage · regain 5 Power Points with an Arcane Background · nudge the story, if you allow it.

Your side: one Benny per player character in a shared pool, spendable on any of yours including Extras. Each of your Wild Cards brings 2 of their own when they appear (plus Luck). No sharing between them without an Edge.

Joker's Wild. A PC Joker → every player gets a Benny. A villain Joker → one into your pool and one to each enemy Wild Card. Either way that side acts whenever it likes this round at +2 Trait and damage.

THE ROUND

About six seconds. One card per Wild Card (plus Edges); like Extras share a card.

On their turn: move Pace and take one action. Movement is not an action. Climbing, crawling, swimming, and Difficult Ground cost 2" per inch.

- **Run:** add the Running die (d6, never Aces), -2 to every action this turn.
- **Multi-action:** up to three. Two = -2 to all, three = -4 to all. Declare before rolling. Free actions are exempt.
- **Free:** a short line, drop an item, go prone, stand (costs 2" Pace), ready two familiar items, resist a roll, and one attempt to shake off Shaken or Stunned at the start of the turn.
- **Hold:** wait. Interrupting is opposed Athletics. Shaken or Stunned while on Hold loses it.
- **Surprise:** ambushers are on Hold. Victims roll Notice; failure means no card that round.

TEST & SUPPORT

Support helps an ally: a fitting skill, success +1 and raise +2 to one Trait total this round, +4 maximum from everyone (Strength Support is uncapped). A Critical Failure costs the ally 2. The bonus expires at the end of their turn.

Test hinders a foe: describe it, roll the skill against the attribute that skill is linked to – Fighting as a Test is opposed by Agility, never Parry. Win and choose Distracted or Vulnerable; with a raise, also Shaken or another subjective effect you allow, such as knocking them prone.

Repeating the same Test earns a steep penalty or a flat no. Extra dice from RoF give one result – take the highest.

ATTACKS & DAMAGE

ATTACK	ROLL	TARGET NUMBER
Melee	Fighting	Parry - 2 + half Fighting (2 unskilled)
Shot	Shooting	4 + range, cover, light
Thrown	Athletics	4 + range

Range: Short -, Medium -2, Long -4, Extreme -8 (needs Aim; never thrown). **Recoil** -2 for more than one shot in an action.

A raise on the attack adds +1d6 damage, once. Damage Aces. Melee damage is Strength + weapon, with no Wild Die.

Against Toughness – finish each hit, Soak included, before the next:

- Under it → nothing that counts.
- Success, 0-3 over → **Shaken**. Already Shaken and hit by physical damage → a Wound, still Shaken. A Test that only Shakes never Wounds.
- Each raise → that many Wounds, and Shaken.

Soak. After damage, before Wounds land: a Benny and a Vigor roll. Each success and raise soaks one Wound from that hit. Soak them all and the Shaken goes too, even an older one. Once per attack; Bennies may reroll the Vigor. Do not count this hit's Wound penalties yet.

STATES

DISTRACTED	-2 all Trait rolls. Ends: their next turn.
VULNERABLE	Others attack and act at +2 against them. Ends: their next turn. Never stacks with The Drop – take the higher.
ENTANGLED	Cannot move; Vulnerable. Break free: Athletics, or Strength at -2.
BOUND	Cannot move; Distracted and Vulnerable; no physical action but breaking free. Success → Entangled, raise → free.
FATIGUED	-1 all Trait rolls. One level per hour unless the source says otherwise.
EXHAUSTED	-2 all Trait rolls. Another level Incapacitates.
SHAKEN	Move and free actions only; may still Run. Spirit free at start of turn, or a Benny anytime.
STUNNED	Distracted, Vulnerable, prone, no move or action, no Gang Up. Vigor free at start of turn: success ends Stunned but Vulnerable lasts to end of next turn; a raise ends it this turn.
WOUNDS	Each is -1 Pace (min 1") and -1 Trait, to a maximum of -3.
INCAPACITATED	No actions, still dealt cards. Healing one Wound clears it.

GOING DOWN

Incapacitated by damage → immediate Vigor:

- **Critical Failure** → dead.
- **Failure** → Injury Table, permanent, and Bleeding Out.
- **Success** → Injury Table until every Wound heals.
- **Raise** → Injury Table for 24 hours, or until the Wounds heal.

Bleeding Out: Vigor at the start of each turn, or each minute outside combat. Failure kills. Success buys another roll; a raise stabilises. An ally may stabilise with a Healing action.

Finishing Move: a wholly helpless victim can be dispatched as an action – automatic unless you see a reason otherwise.

Roll the Injury Table as printed; do not invent rows. Fatigue Incapacitation runs on its own track, not this one.

HEALING

Healing skill: ten minutes per Wound level, -1 without a kit. Success removes one Wound, a raise two, a Critical Failure adds one.

Golden Hour: one attempt per healer per patient within the first hour – a different healer may still try. After that only natural healing or the healing power (greater healing) works. Healing may also stabilise someone Bleeding Out, as an action.

Natural: Vigor every five days. Success recovers one Wound, a raise two, a Critical Failure adds one. Let allies Support that roll.

AT THE TABLE

- **Aim** – whole turn, stationary: the next first shot ignores 4 points of range, cover, Called Shot, Scale, or speed, or simply takes +2.
- **Defend** – whole turn, no extra actions, no Run: +4 Parry until the next turn.
- **Wild Attack** – +2 Fighting and damage; Vulnerable until the end of the next turn.
- **Called Shot** – limb -2; head or vitals -4 for +4 damage; the face of an open helmet -5, and the helmet does not count.
- **Cover** – -2 / -4 / -6 / -8. Where cover should have stopped a hit, it acts as Armor of that value. Prone against ranged fire at 3" + is -4 and does not stack with cover; prone in melee is -2 Parry and -2 Fighting.
- **The Drop** – +4 attack and damage for one action. Shaken or worse then forces Vigor or a knockout.
- **Gang Up** – +1 Fighting per extra adjacent attacker who is not Stunned, to +4; each adjacent ally of the defender cancels one.
- **Grapple** – opposed Athletics. Win Entangles; a raise, or a second success, Binds. The grappler is Vulnerable while holding someone Bound. Crush is a Strength roll as damage.
- **Withdraw** – every adjacent foe who is not Shaken or Stunned gets a Free Attack.
- **Unarmed defender** – an armed melee attacker gets +2; does not stack with The Drop.
- **Unstable platform** – -2 to shoot or throw from a mount or moving vehicle. Off-hand -2 unless Ambidextrous.
- **Illumination** – Dim -2, Dark -4 with nothing visible past 10", Pitch -6.
